MULTIPAD
KNIEPOLSTER / KNEE PADS

- 1. Manufacturer of working trousers (a.) and knee pads (b.):
a. SCHEIBLER Importgesellschaft mbH
Industriestraße 11
94330 Salching
Tel. +49 (0) 9421 / 9627-0
Fax +49 (0) 9421 / 9627-150
www.scheibler-wear.de
b. KNEETEK®
Auf der Kaiserbitz 3, 51147 Cologne
Phone 0049 (0)2203 93566-0
2. Description of trousers: see enclosed table (description of trousers).
3. Description of knee pad: article no. 60200; size approx. 150x250x20 mm;
reference no. EN 14404:2004+A1:2010 and regulation (EU) 2016/425; the knee
pad is made mainly of polyethylene.
4. Protection in accordance with EN 14404:2004+A1:2010 is only given by the
combination of trousers with knee pads.
5. Performance level 1 or 0
The performance level 1 or 0 depends on the combination of trousers + knee
pads -> see enclosed table and label in the trousers

- X The performance level, i.e. 1 or 2, is shown beneath the symbol. Protection
level There are three protection levels: Level 0 is for knee protection that is
suitable for flat surfaces but offers no protection against penetration. Level
1 is for knee protection that is suitable for flat or uneven surfaces and offers
protection against penetration with a force of (100±5) N. These knee pads
are not suitable for pointed surfaces on which a spot pressure of more than
100 N is exerted and which are higher than 1 cm (e.g. in mines or quarries).
Level 2 is for knee protection that is suitable for use on flat or uneven surfa-
ces under difficult conditions and which offers protection against penetration
with a force of (250±10) N.
6. The knee pads should be inserted in appropriate pockets and fixed in position
so that the central part of the pad bears the main weight of the kneeling person
so as to guarantee an optimum distribution of pressure. The moulded or notched
side of the knee pad is always on the outside, the inside is marked.
7. Explanation of the markings:
• The marking for expiry date is ⌘
• The marking for the lot number is Lot
• The marking for up is an arrow pointing upwards and the word Up
• The marking for one-size is Unisize
• The marking for left and right is Left/ Right
• The marking for the inside of the pad is inside
• The marking for the protection level is Level
• The marking for knee protector type is Typ
8. Use: For all kneeling activities and work on various surfaces provided the
working clothing has suitable knee pockets and their correct use is guaranteed.
9a. The pads are suitable for universal use in all certified clothing sizes.
9b. Universal size for adults between 50 kg - 100 kg. The performance of the pads
may be reduced with weights over 100 kg.

- 9c. The performance of the knee pads may be reduced at temperatures over 50°C
(122°F).
10a. The knee pads are not suitable as protection during use in areas where there
is a risk of falling, for example.
10b. The knee pads are not resistant to chemicals, heat or fire.
11a. The knee protection is water-resistant.
11b. A water impermeability test has not been performed.
12. All undefined fields of use have to be clarified in advance by consulting the
manufacturer. The manufacturer can accept no liability for any damage or injury
caused by incorrect use such as excessive folding and bending.
13a. Knee pads are items of personal protective equipment that are used by
kneeling persons to protect their knees.
13b. Knee protector type 1: knee protection that is independent of other clothing
and is fastened to the leg. 13c. Knee protector type 2: foam or other pads that
can be inserted into pockets in trouser legs or which are permanently fastened
to the trousers. The position of type 2 knee protectors in or on the trousers
can either be fixed or adjustable. 13d. Knee protector type 3: equipment
that is not fastened to the body but provided at the different places of work
according to their movements. This can be provided for each knee separately
or for both knees together.
13e. Knee protector type 4: knee protection for one or both knees that is part of
devices with additional functions such as a frame used as an aid to standing
up or a seat for a kneeling posture. The knee protection may be fastened to
the body or used separately.
14. Further personal protective equipment (PSE) may have to be worn by the
user depending on their personal work and task (e.g. safety goggles, safety
helmet...).
15. The knee pads cannot offer complete protection against injuries. Their
protective effect has to be verified beforehand in each separate case or agreed
with the manufacturer.
16. Storage: The knee pads should always be kept dry and stored in a dark place
in accordance with DIN 7716 and ISO 2230.
17. Aging: The knee pads feature an expiry date with the specification of the month
and year (MM/YYYY) and a lot number. Normal wear and tear are exempted
from the expiry date for aging.
18. Heavy soiling, modifications or incorrect use can reduce the performance of the
knee pads in a dangerous way. Make sure that the kneed pads are positioned
exactly in the trousers. Damaged knee pads on surfaces and structures no
longer provide protection and have to be disposed of correctly or with the
domestic waste.
19a. Clean the knee pads in accordance with the care instructions as follows:
19b. Remove the knee pads before cleaning, washing, drying and ironing the
corresponding trousers.
